Tailored Project Management Courses

Projectability have helped customers develop courses to meet their specific Project Management training needs. We have developed courses to help companies develop their own in-house Methodologies or to address the specific nature of their industry sector.

Our courses build on established "best practise" principles and engage the participants through structured exercises that embed the concepts imparted during tutor led instruction sessions.

Our courses are always accompanied by supporting reference materials and sample documents provided in digital format which can help participants off to a flying start with their newly acquired skills.

If you would like to discuss how we can develop a course to meet your specific needs please contact us on 01753 621200 or email to register your interest in a tailored course.
