

# EPT Icons

---

The following was originally created by Martin Laukkanen, it is reproduced here for reference purposes.

One thing I always have to search for when creating a new EPT is the appropriate icon to use. I have previously found and used some of the out-of-the-box icons that can be found in any default Project Server 2010 installation and thought that I might share them here.

There is in fact a long list which I have included below (forgive me copyright gods in MS!), to use one of these icons, just update the image URL under **Server Settings** → **Enterprise Project Types**, for example to update the default *Sample Proposal* with any of the icons below, simply modify the image URL under:

## Image

Specify an image for the Enterprise Project Type. This is the image users will see next to the Enterprise Project Type while you are creating new projects in the Project Center.

*Note: If you have an image on your computer, you have to first upload the image to an online document library (for example, 'Shared Documents' library in PWA) and then specify the image URL from here.*

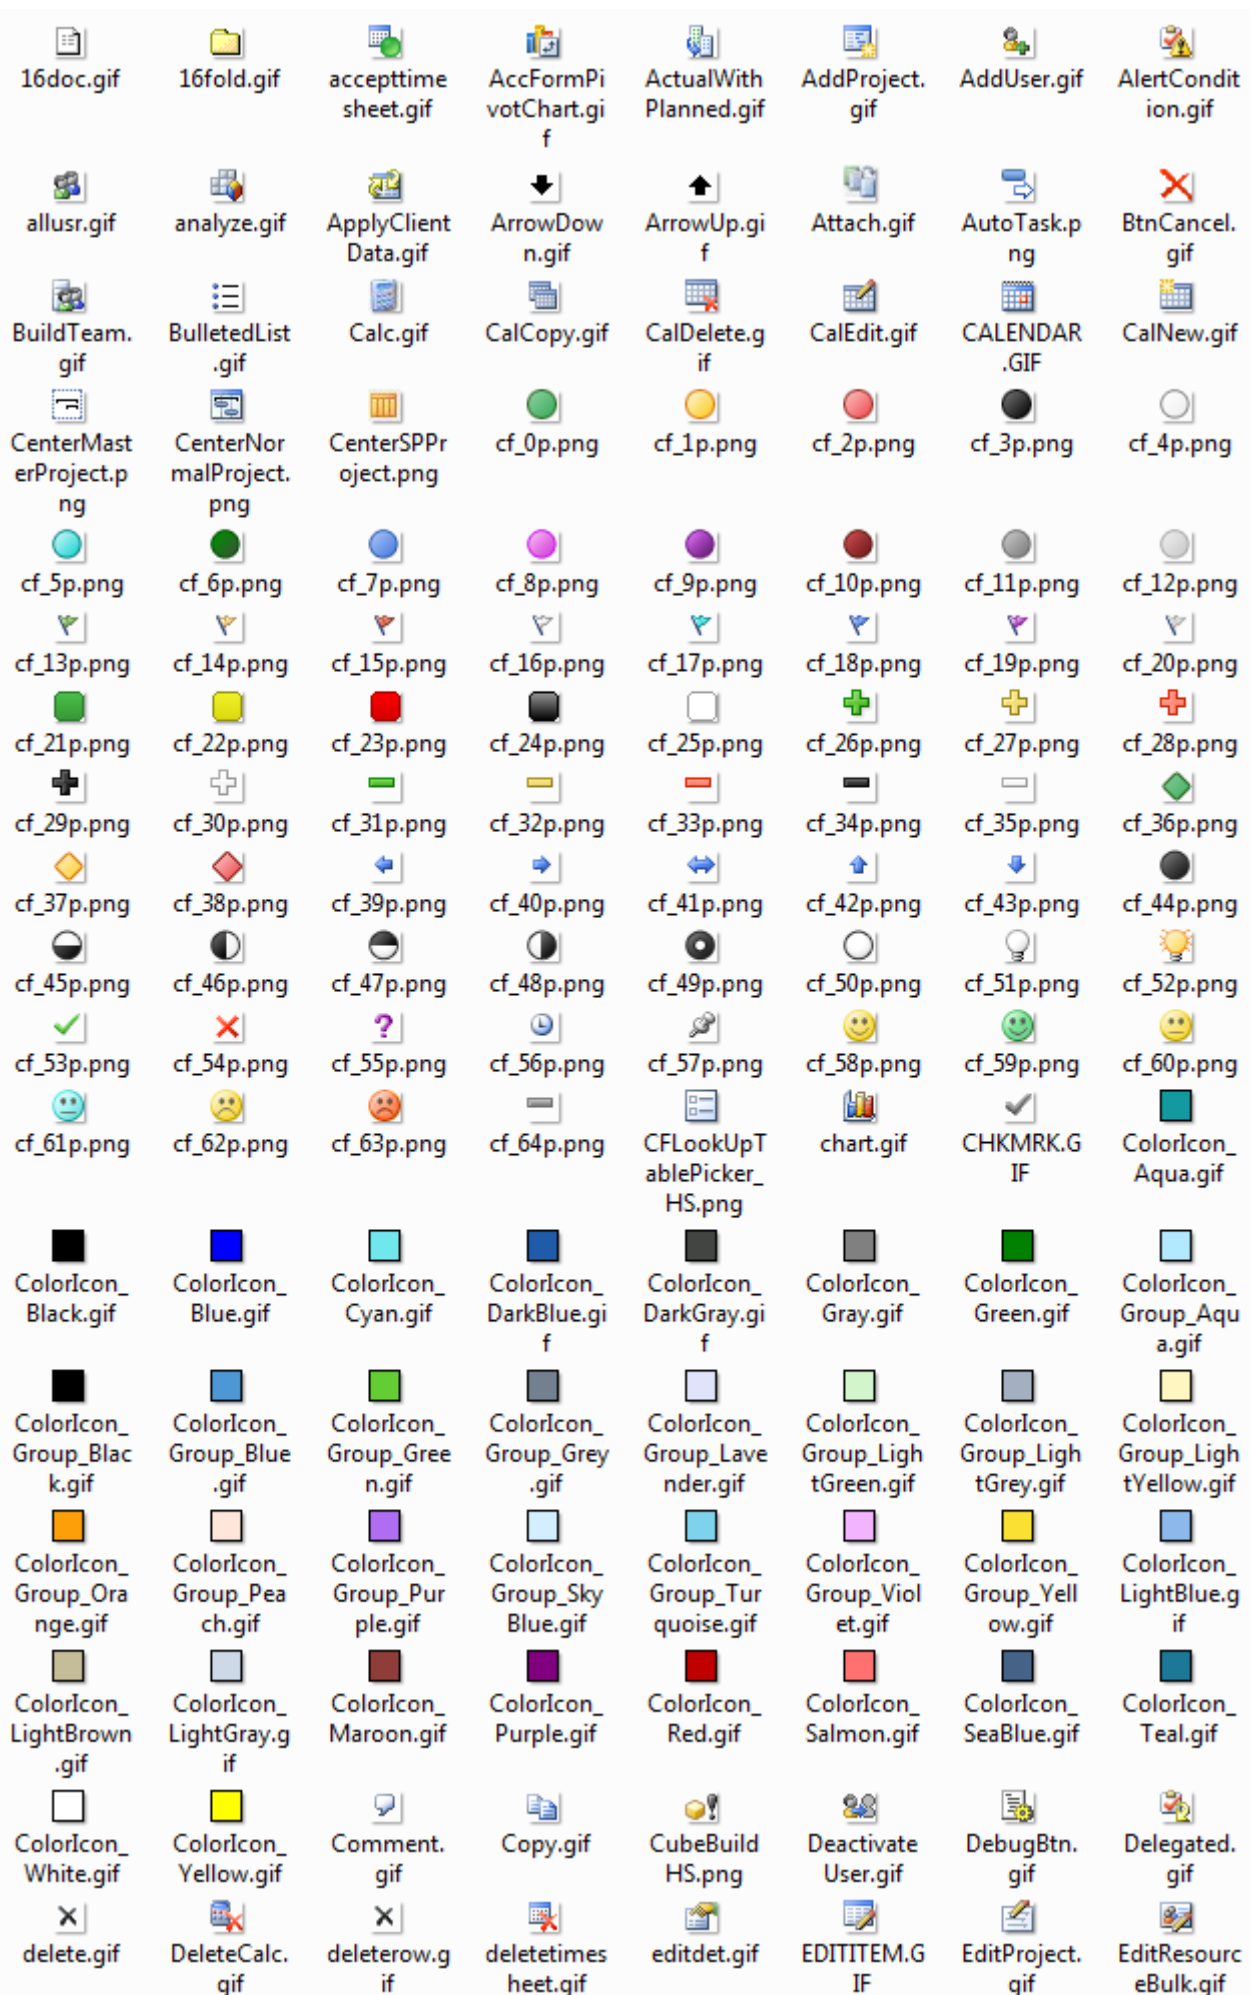

Type the URL: ([Click here to test](#))

`/_layouts/inc/pwa/images/SampleProposal_HS.png`

For a Master Project icon (taken from the image below), replace the URL above with the following:

`/_layouts/inc/pwa/images/CenterMasterProject.png`

Full list of icons (16×16 size only):
